

HARDWARE TRANSFER GUIDE

SARGENT®

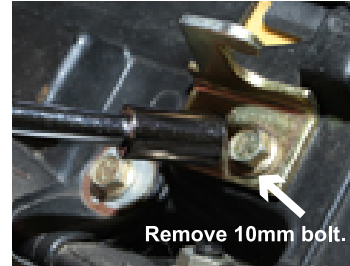

Triumph Sprint - 1999/2004

OEM seat mounting bracket removal and installation.

Thank you for purchasing a Sargent World Sport Performance Seat. Please follow this guide to remove the OEM mounting brackets from your existing seat and install them on your new SARGENT seat.

This procedure will only take a few minutes to perform and requires no special tools or parts. Simply follow the instructions and transfer the brackets as shown.

Take special care in the handling of the seat during this procedure by placing the top of the seat on a padded surface. Also, avoid stripping, overtightening or crossthreading the bolts during this process.

- 1.** Remove the 10mm bolt and lift the bracket off its alignment guide. Please note that the brackets are specific to the left and right side of the seat pan.

- 2.** Reinstall the mounting bracket by finding the alignment guide shown in the photo above. Place the OEM bracket over the guide, insert 10mm bolt and tighten. Do not over tighten and strip the threads.
